REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-4 recite a semiconductor memory device that performs read and write operations in synchronization with an external clock signal. The memory device comprises a column selection line enable control circuit that generates even-numbered column selection line enable signals in response to the first clock signal and that generates odd-numbered column selection line enable signals in response to the second clock signal; a switching that connects a pair of bit lines to a pair of even-numbered input/output lines in response to the even-numbered column selection line enable signals and that connects the pair of bit lines to a pair of odd-numbered I/O lines in response to the odd-numbered column selection line enable signals; and an I/O line sense amplification circuit that senses and amplifies even-numbered read data from the pair of even-numbered I/O lines and outputs the amplified even-numbered read data to a pair of data lines in response to the first clock signal, and that senses and amplifies odd-numbered read data from the pair of odd-numbered I/O lines and outputs the odd-numbered read data to the pair of data lines in response to the second clock signal.

The prior art does not teach or suggest the above memory device having all the elements as recited in claims 1-4. Therefore, the application is in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
